## About the conference

Since beginning of 2020 we were living in an unprecedented appalling time due to the pandemic, but with 2022 we can re-start with cautious optimism our activities and resume our traditional NESA DAYS events.

The New European Surgical Academy (NESA) is an international, interdisciplinary organization with members in 57 countries and is associated with international organizations like FIGO, the German Gynaecological Association, the Danish Surgical Association and the Hong Kong Medical Academy.

The NESA modifies and improves surgical procedures, has created the first European working group for natural orifice surgery and supported the European Tele surgical project. The NESA initiated and performed several surgical workshops in countries with limited resources.

The traditional NESA Days are interdisciplinary surgical conferences which enable surgeons from different disciplines to learn from each other and implement in their own daily practice's ideas from other disciplines.

The NESA Days 2022 will take place in London, UK on 24-26, November 2022 at the Hilton London Metropole hotel. The conference will be novelties in endoscopy, robotics and tele surgery in all surgical disciplines. Participants will learn about optimal ways of overcoming unexpected situations.

**Venue: Hilton London Metropole, London**
